Commissioner for Patents
Washington, D.C. 20231

Sir:

In accordance with the duty of disclosure under 37 C.F.R. § 1.56, Applicant hereby notifies the U.S. Patent and Trademark Office of the documents which are listed on the attached Form PTO-1449 and/or listed herein and which the Examiner may deem material to patentability of the claims of the above-identified application.

One copy of each of the listed documents is submitted herewith.

The present Information Disclosure Statement is being filed: (1) No later than three months from the application's filing date for an application other than a continued prosecution application (CPA) under § 1.53(d); (2) Before the mailing date of the first Office Action on the merits (whichever is later); or (3) Before the mailing date of the first Office Action after filing a request for continued examination (RCE) under § 1.114, and therefore, no Statement under 37 C.F.R. § 1.97(e) or fee under 37 C.F.R. § 1.17(p) is required.

In compliance with the concise explanation requirement under 37 C.F.R. § 1.98(a)(3) for foreign language documents, Applicant submits the following explanations:

Brief descriptions are provided for both foreign language references.

The submission of the listed documents is not intended as an admission that any such document constitutes prior art against the claims of the present application. Applicant does not waive any right to take any action that would be appropriate to antedate or otherwise remove any listed document as a competent reference against the claims of the present application.

Respectfully submitted,

INFORMATION DISCLOSURE STATEMENT

Given below are prior arts with their brief descriptions.

Japanese Literature

(1) Japanese Laid-Open Patent No.H7-94036

In an electro- magnetic interference work of a flat cable, in order to improve workability of that work, the flat cable is formed containing a film forming material consisting of a thermoplastic resin having a heat sealing property as a main constituent and silver particles and /or copper particles.

(2) Japanese Laid-Open Patent No.H11-120831

In order to obtain a shielding tape having superior properties of electro-magnetic wave shielding and sliding as well as flexibility and nevertheless low priced, the shielding tape is formed with a silver deposited layer and an adhesive resin layer containing nickel filler having a heat sealing property provided one upon another on one side of an electric insulating film as a protective layer, the sealing flat cable is sheathed so that the adhesive resin layer containing the nickel filler contacts with uninsulated portions of ground lines.
